

Set up my email account to work with Outlook 2007

Note: If you're having problems sending email in Outlook, review the steps below to make sure all steps and settings match exactly.

1. In your Outlook toolbar, click **Tools** and select **Account Settings**.

2. Click the **E-mail** tab. Then, click **New**.

3. In the **Add New E-mail Account** dialog box, select **Microsoft Exchange, POP3, IMAP, or HTTP**. Then, click **Next**.

Microsoft Exchange, POP3, IMAP, or HTTP
Connect to an e-mail account at your Internet service provider or your organization's Microsoft Exchange server.

Other
Connect to a server type shown below.

Fax Mail Transport
Outlook Mobile Service (Text Messaging)

4. Click the **Manually configure server settings or additional server types** checkbox. Then, click **Next**.

Add New E-mail Account

Auto Account Setup

Your Name:
Example: Barbara Senkovic

E-mail Address:
Example: barbars@contoso.com

Password:
Retype Password:
Type the password your Internet service provider has given you.

Manually configure server settings or additional server types

< Back Next > Cancel

5. Click **Internet E-mail**. Then, click **Next**.

Internet E-mail
Connect to your POP, IMAP, or HTTP server to send and receive e-mail.

Microsoft Exchange
Connect to Microsoft Exchange for access to your e-mail, calendar, and contacts.

Other
Connect to a server type shown below.

Fax Mail Transport
Outlook Mobile Service (Text Messaging)

6. Enter your **User Information**:

- In the **Your Name** field, type your name the way that you want it to appear to other people.
- In the **E-mail Address** field, type the complete email address. Make sure to include the user name, the @ symbol, and the domain name. For example, username@yourdomain.com.

7. Enter your **Server Information**:

- Select **IMAP** for server type. (We recommend you use IMAP. IMAP accounts are the recommended option for customers that want to check email from multiple sources (home computer, work computer, mobile phone).)
- In the **Incoming Mail Server** field, enter **imap.homestead.com** for **IMAP** (or **pop.homestead.com** for **POP3**).
- In the **Outgoing Mail Server** field, enter **smtp.homestead.com**.

8. Enter your **Logon Information**:

- In the **User Name** field, enter your email address. For example, **username@yourdomain.com**.

- In the **Password** field, enter the password for the account you want to access from Outlook.

Tip: Click to select the **Remember password** checkbox. If you don't, you'll have to enter your password each time you want to do anything with your email in Outlook.

9. Clear the **Require logon using Secure Password Authentication** checkbox.

10. Set up the advanced settings based on the type of server you chose in Step 7:

- For **IMAP**, confirm the advanced settings using the [IMAP email specifications](#).
- For **POP3**, confirm the advanced settings using the [POP3 email specifications](#).

Important: If you don't complete the advanced settings, you'll see error message **550 #5.1.0 address reject**.

Note: To test the settings, send a message directly from Outlook.
